

How to Plant Your Seed Paper

When you're ready to plant your seed paper, choose a suitable location in the garden or a container and prepare the soil so it is free of weeds and any large lumps.

Place the entire sheet of paper on the soil or tear it into smaller pieces and sprinkle it on the soil. Cover all pieces of paper with a thin layer of soil and water thoroughly. Keep moist so the seeds can germinate.

Watch for your flowers to come up and enjoy!
